

Shaftesbury Sixth Form

Summer Preparation Task

Subject name: Computer Science A Level

Exam Board: OCR

Purpose of task:

To complete a tutorial in CSS.

To explore the aspects of CSS.

To create a webpage using notepad

Recommended resources:

<https://www.w3schools.com/css/default.asp>

Task 1:

Work through the CSS Tutorial

CSS is a language that describes the style of an HTML document.

CSS describes how HTML elements should be displayed.

This tutorial will teach you CSS from a basic to advanced level.

Task 2:

Once complete you should be able to create a web page (a lot like the "Welcome to My Homepage" from the CSS Introduction section)

Complete your page with relevant information about the things that you have learnt about CSS whilst undertaking this challenge.

Create the webpage using Notepad. Save document as .html

Deadline for task:

Deadline for Task: First lesson in week commencing 3rd September 2018
